Chen Ling

Address: 201 Dowman Drive, Atlanta, Georgia, 30322, USA
Email: chen.ling@emory.edu **Phone**: +1 (857)-259-0749 **Website**: lingchen0331.github.io/

PRINCIPAL INTERESTS

My research focuses on data mining and applying machine learning techniques to handle real-world problems. More concretely, my works can be divided into two streams. *1) Data Mining on Graphs:* Deep Graph Generation, Graph Representation Learning, and Graph Inverse Problem; *2)* Large Language Model: Customizing large language models into domain-specific applications; and *3) Neural Machine Reasoning:* Analogical Reasoning, Case-based Reasoning, and Commonsense Reasoning.

ACADEMIC BACKGROUND

Ph.D. Computer Science 2020 - present
Emory University, Atlanta, GA

- Ph.D. research in graph data mining under supervision of Professor Liang Zhao.
- Conducted research in *graph data mining* and *neural machine reasoning* with demonstrated publication history in top-tier conferences, including ICML, KDD, ICLR, theWebConf (WWW), ICDM, SDM, and ECML-PKDD.

M.Sc. Computer Sciences 2018 - 2020
University of Delaware, Newark, DE

- Conducted research in the area of social network analysis and time series analysis with demonstrated publication in top-tier conferences.

B.Sc. Computer Science 2014 - 2017
University of Vermont, Burlington, VT

- Recipient of Global Gateway Academic Achievement Scholarship, 2015
- Recipient of International Student Accomplishment Scholarship, 2014

SPECIAL ACHIEVEMENTS

Awards and Invited Talks

- *Professional Development Funding.* $2,500, Emory University
- *ICDM Student Travel/Attendance Award.* 2021, 2022.
- *National Science Foundation Student Travel Award.* 2022.
- *ICDM Best Paper Candidate*, for "Deep Generation of Heterogeneous Networks", 21st IEEE International Conference on Data Mining, 2021.
- SIGNET Seminar at the University of Delaware, *NesTPP: Modeling Thread Dynamics in Online Discussion Forums*, Newark, DE, 2019.
- *Dean's List of Computer Science Department*, for "students achieved top-10% GPA", the University of Vermont, 2015, 2016.
- *Global Gateway Achievement Scholarship* for "Campus-wide Academic Achievement", $30,000 for three consecutive years, the University of Vermont, 2015.
- *International Student Accomplishment Scholarship* for "Academic Achievement", $10,000, the University of Vermont, 2014.

Academic Service

- Reviewer: KDD (2022, 2023), ECML-PKDD (2022), NeurIPS (2022, 2023), EMNLP (2023), WSDM (2024)
- Program Committee: DLG-KDD (2020, 2021, 2022), DLG-AAAI (2021, 2022, 2023), UDM-AAAI (2023)

SELECTED PUBLICATIONS

EMPLOYMENT HISTORY

Research Associate 2023 - Present
NEC Labs America, Data Science & System Security Group, Princeton, NJ

- Participated as a remote research contractor for various publication-oriented long-term projects.
- Proposed to design a prompt-based natural language reasoning framework for commonsense QA tasks.
- Designed a Graph Neural Network-based framework with a customized optimization method for analogical reasoning.

Research Assistant 2020 - Present
Emory University, Atlanta, GA

- Worked with Professor Liang Zhao on various research projects in the area of deep graph representation and neural machine reasoning, the relevant research projects are published at top-tier conferences.
- Leveraged deep generative models to generate complex structured data, including heterogeneous graph generation, temporal graph generation, and spatiotemporal graph generation.
- Leveraged deep graph representation learning to conduct network behavior analysis, including information diffusion source localization and influence maximization on social networks.
- Led several undergraduate computer science courses (Advanced Algorithm Analysis and Intro to Java Programming) as graduate TA and co-instructor.

Research Assistant 2018 - 2020
University of Delaware, Newark, DE

- Worked on several research projects in the area of social network rumor containment and information diffusion function modeling.
- Leveraged data-driven approaches to capture complex correlations between social cascades, and the results are published at ACM HT'20 entitled with *Nestpp: Modeling thread dynamics in online discussion forums.*
- Designed structure-preserving models with provable performance guarantees in social network dynamics prediction, and the results are published at IEEE ICME'21 entitled with *On Forecasting Dynamics In Online Discussion Forums.*

Research Intern 2018
iFLYTEK, Anhui, CHINA

- Worked as a Natural Language Processing (NLP) associate researcher at iFLYTEK's Research platform.
- Performed creation and optimization of machine & deep learning models for multi-label classification, label distribution prediction of MOOC test questions, and text similarity calculation. Increased classification accuracy of the multi-label classification from 66% to 89%.
- Organized weekly Paper Reading Club that includes more than 20 undergraduate and graduate students for sharing innovative research ideas and presenting state-of-the-art research papers.

Cognitive Solution Developer 2016
IBM, Burlington, VT

- Participated in a full-stack team to develop a cloud-based tone analyzer for image sentiment analysis using Watson Cognitive Cloud.

- Assisted senior software engineers in designing API interfaces in the development of the Watson Business Mobile App.
- Created and presented a computer vision project – Human Face Recognition using IBM Watson API in IBM's worldwide IBM Intern Conference.
